Claims 1-6,8,9,11-38 and 41-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoshino et al for the reasons of record.

Claims 1-6,8,9,11-38 and 41-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michaelson et al for the reasons of record.

Applicant's arguments filed 5-25-2005 have been fully considered but they are not persuasive. Some of the art hydroxamic acids contain N containing functional groups attached to the C part of the hydroxamic group. Thus they are similar in structure to the instant bis-hydroxamic acids. Note that no structure is given for the "chiral bishydroxamic acid ligand" in claim 1. Again as many chiral mono hydroxamic acids of different structures have been shown to be useful in increasing the asymmetric induction in the instant oxidations, it would have been obvious to the ordinary worker in the art that "chiral bishydroxamic acid" would do the same.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
